## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Randi Karpinia on December 30, 2004.

The application has been amended as follows:

10 Claim 1 cancelled. New claim 11 added in place of claim 1:

11. (New) A wireless device for transmitting packets of a message during an assigned time slot of cycles of a time-division protocol, comprising:

a housing, the housing having a first position and a second position;

a controller within the housing, the controller adapted to associate a first transmit duty cycle with the first position and a second transmit duty cycle with the second position, wherein the first transmit duty cycle comprises message packet transmission in the assigned time slot of adjacent cycles of the protocol, and wherein the second transmit duty cycle comprises message packet transmission in the assigned time slot of at least every 2<sup>nd</sup> cycle of the protocol; and

a transmitter coupled to the controller, the controller adapted to cause the transmitter to operate at the first transmit duty cycle when the housing is in the first

position and to operate at the second transmit duty cycle when the housing is in the second position.

Page 3

Claim 2 cancelled. New claim 12 added in place of claim 2:

12. (New) A device for transmitting packets of a message during an assigned time slot of cycles of a time-division protocol, comprising:

a housing, the housing having at least two portions, the at least two portions being movable to each other into a first position and a second position;

a controller within the housing, the controller adapted to associate a first transmit duty cycle with the first position and a second transmit duty cycle with the second position, wherein the first transmit duty cycle comprises message packet transmission in the assigned time slot of adjacent cycles of the protocol, and wherein the second transmit duty cycle comprises message packet transmission in the assigned time slot of at least every 2<sup>nd</sup> cycle of the protocol; and

a transmitter coupled to the controller, the controller adapted to cause the transmitter to operate at the first transmit duty cycle when the at least two portions of housing are in the first position and to operate at the second transmit duty cycle when the at least two portions of housing are in the second position.

Claim 3 is cancelled.

Claim 4 is cancelled.

Application/Control Number: 09/627,170

Art Unit: 2661

Claim 5, line 1 is changed from "The device of claim 4..." to --The device of claim

Page 4

12...--

Claim 6, line 1 is changed from "The device of claim 5..." to --The device of claim

12...-

5

10

20

Claim 8, at line 10 "the housing" should be changed to --the housing,-- and after line 10 --wherein the first transmit duty cycle comprises message packet transmission in the assigned time slot of adjacent cycles of the protocol, and wherein the second transmit duty cycle comprises message packet transmission in the assigned time slot of at least every 2<sup>nd</sup> cycle of the protocol;-- should be inserted.

Claim 10, at line 6 "at a second position" should be changed to --at a second position,-- and after line 6 --wherein the first transmit duty cycle comprises message packet transmission in the assigned time slot of adjacent cycles of the protocol, and wherein the second transmit duty cycle comprises message packet transmission in the assigned time slot of at least every 2<sup>nd</sup> cycle of the protocol;-- should be inserted.

The following is an examiner's statement of reasons for allowance: Claims 5-12 are allowable because the prior art of record fails to teach, in combination with all other claim limitations, "... associate a first transmit duty cycle with the first position and a second transmit duty cycle with the second position," "a transmitter coupled to the controller, the controller adapted to cause the transmitter to operate at the first transmit

10

duty cycle when the at least two portions of housing are in the first position and to operate at the second transmit duty cycle when the at least two portions of housing are in the second position," and "wherein the first transmit duty cycle comprises message packet transmission in the assigned time slot of adjacent cycles of the protocol, and wherein the second transmit duty cycle comprises message packet transmission in the assigned time slot of at least every 2<sup>nd</sup> cycle of the protocol."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joshua Kading whose telephone number is (571) 272-3070. The examiner can normally be reached on M-F: 8:30AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth Vanderpuye can be reached on (571) 272-3078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
